

Members who created accounts with Local Thyme last year will need to renew their account with Local Thyme, because our farms' access from last year has expired.

1. To renew, go to [localthyme.net](http://localthyme.net) and enter your username and password (if you don't remember it, ask to have your password reset). You must be logged into your account while you complete these next registration steps in order to access the site's resources.

2. Then go to <http://www.localthyme.net/register/?farm=RECIPEBARR>

3. Choose our farm and your delivery day, and click the sign up button.

4. Click Subscribe. You should now see our Farm's Logo in the center of the page and a welcome message.

5. Click Home and you should now see a navigation bar that says home; week's plan; veggie guide; resources; support. If you don't see these, please contact [pat@localthyme.com](mailto:pat@localthyme.com) with the name of our farm and your pick up day and she will fix your account.
